

Oscilloscope Music

Jerobeam Fenderson

General booking information

Liveset: audiovisual live performance with a laptop and an analog oscilloscope, ca. 40min

what needs to be available on site:

- PA with 2 audio channels + cables (TRS jack)
- video projector (HDMI, 720p or higher) + HDMI cable
- projection screen above or beside the stage
- table, ca. 1m*1m*1m
- 4 sockets (Europlug)

I also do workshops and live shows together with Hansi3D (creator of OsciStudio). Ask for more information!

Fees: €600 + travel costs (from Austria) and accommodation + 13% VAT (reverse charge is possible if you have a European VAT identification number). If you're in a country where I'll need a visa or the fee seems unfeasible, don't be afraid to ask, we can probably sort it out somehow.
